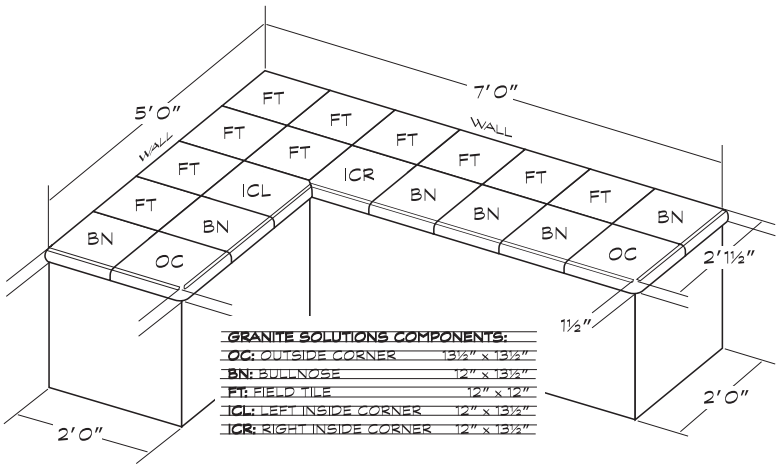
Benissimo™ PROJECT PLANNER

MEASURING INSTRUCTIONS

To get started, simply measure the wall and make your counter layout, noting any cutouts for refrigerators, sinks, stoves, etc. Some helpful hints:

1. Note where cabinets meet walls or other barriers - this will affect the components needed.
2. Cuts should be made in the center portions across a sink or stove, if possible.
3. Bars and overhangs require additional support - see **Installation** on the Benissimo website for more details



TOTAL PIECE COUNTS	OUTSIDE CORNER	BULLNOSE	INSIDE CORNER LEFT	INSIDE CORNER RIGHT	FIELD TILE

1 square = 1 foot = 1 Granite Solutions component | NOTE: Always order extra: either 5% of each component, or at least an additional Bullnose & Field Tile
